

1994 Land Grant Institutions' Extension Program

Paragraph for member request letters going to the House and Senate Agriculture Appropriations Subcommittees:

I support the 1994 Land Grant Institutions' Extension Program, which provides educational funds for hundreds of our nation's American Indian communities. This program helps tribal families and communities respond to critical needs related to youth development, diabetes and other diet-related illnesses, and economic development. The 1994 land grant extension programs provide American Indians with the tools for improving their lives and their communities. I support funding for this program at a level of \$5 million.

Note: Form for House members on reverse of this sheet.
