

1994 Land Grant Institutions' Research Program

Paragraph for member request letters going to the House and Senate Agriculture Appropriations Subcommittees:

I support the 1994 Land Grant Institutions' Research Program, which provides funds for applied research at our nation's 31 tribal centers of higher learning. Tribal scientists are seeking answers to critical issues such as the high prevalence of diabetes among American Indians and chronic under-development of tribal economies. Through tribal research, long-term solutions will be found that will enrich the lives of our American Indian citizens. I support funding for this program at a level of \$3 million.

Note: Form for House members on reverse of this sheet.
