

International Science and Education Grants

Paragraph for member request letters going to the House and Senate Agriculture Appropriations Subcommittees:

The International Science and Education grants program seeks to incorporate substantive international activities into programs related to food systems, agriculture and natural resources at America's land-grant colleges and universities. These institutions have an important role to play in this new era of heightened security – particularly in the area of agrosecurity – and global cooperation. I support a funding level of \$1.5 million for the International Science and Education grants program.

Note: Form for House members on reverse of this sheet.
