

## Food and Agriculture Defense Initiative

### *Paragraph for member request letters going to the House and Senate Agriculture Appropriations Subcommittees:*

The President's budget for CSREES includes a \$30 million request to fund the National Plant Diagnostic Network (NPDN) and its counterpart, the National Animal Health Laboratory Network (NAHLN). These networks of laboratories and experts can, more rapidly than ever, identify dangerous pathogens that threaten crops or livestock and give county extension agents, growers, veterinarians, processors and others the information they need to head off problems before they become widespread. Also included within the \$30 million request is funding for The Extension Disaster Education Network, or EDEN, a collaborative, nationwide effort by the Cooperative Extension Service, improves the delivery of services to citizens affected by disasters of all kinds. I support a funding level of \$30 million for these vital agrosecurity programs.
