

Resident Instruction and Distance Education Grants Program for the U.S. Insular Areas

Paragraph for member request letters going to the House and Senate Agriculture Appropriations Subcommittees:

The Resident Instruction and Distance Education Grants Program for the Insular Areas was authorized in the 2002 farm bill. Designed to address the critical agricultural research needs of the land grant universities in the U.S. territories and Puerto Rico, the program provides competitively awarded grants to meet the unique needs of this underserved set of universities. The program will help land grant universities in the insular areas develop education and training programs while working in collaboration with leading universities on the mainland. I support funding for this program at \$1.0 million.
